VRpatients™ nursing

VRpatients™ is the most powerful no-code immersive sim-builder in the world. VRpatients is the only platform that empowers the sim specialist within objective grading rubric that is error free, asynchronous accessibility through virtual reality headset or web browser, and unlimited potential to build any simulation to meet your students' needs without additional cost.

With VRpatients you can provide life-like clinical experiences for your students that meet all nursing accreditation education standards, a diversity of avatars that are physiologically responsive and medically accurate, and different scenarios each day that are deployable via mobile phone or computer. This total control for the Nurse Educator provides a fully customizable tool to give the students an unparalleled virtual simulation experience.
- Objective grading
- Standardized
- Iterative
- Train faster
- Reduce errors
- Modify scenarios
- Deploy remotely
- Assess often
- Teach your way
- Use templates
  or create new

Instructors:
- Evaluate
- Design scenarios
- Deploy remotely

Students:
- Assess
- Identify
- Analyze cues
- Prioritize
- Take action

VRpatients is an infinitely scalable and asynchronous platform. Test clinical judgment and measure outcomes, virtually. Educate more learners with more patients today.

CLINICAL

Build unlimited clinical experiences, code-free.

VRpatients™ allows the Nurse Educator to objectively assess the clinical judgment of nurses to ensure competency and consistent training on new or existing protocols with an agile customizable system. Increase your efficiency and reduce costs by training faster - anywhere, anytime. VRpatients has a Customer Success Team that is available to do on boarding and assist with questions. New customers are provided remote on boarding and ongoing virtual support. VRpatients University provides asynchronous video tutorials and training; for an additional cost we provide on site support and orientation. Our Customer Success team is here to teach and engage with your staff throughout your time on our platform.

Never pay thousands for new scenarios engineered by game developers that take weeks to receive and do not fit your specific curriculum needs. Empower your instructors with a tool to create virtual reality simulations their way, no coding required. The VRpatients pricing model is simple, scalable, and affordable. Request a demo or call us to learn how we can turn your organization into an immersive training provider today.

- Premium support
- Help center
- Tutorial videos
- Pre-loaded patient templates
- 20 templates
- 22 environments
